About Course

Urbancode's Occupational English Test (OET) training course focuses on assessing language proficiency for healthcare professionals. This course is tailored to medical communication, it evaluates listening, reading, writing, and speaking skills. Recognized globally, OET ensures effective communication in healthcare settings, with a focus on linguistic competence in patient care, medical documentation, and professional interactions

Primary Aspect

- 40 hrs. Instructor-Led Training
- Practice & Exercises for Speaking | Listening | Writing | Reading
- Mentor Support

Why should you choose this course?

Career Advancement

The healthcare professionals like dentist, chiropractor, clinical psychologist etc. can enhance your employability and opportunities in English-speaking healthcare environments.

Effective Communication

The course sharpens your ability to communicate precisely and confidently in medical scenarios, fostering better patient care and professional interactions.

Exam Success

Training prepares you for OET's unique format, improving your chances of achieving a high score and passing the exam.

Global Recognition

OET is widely recognized by healthcare institutions worldwide, opening doors to work or further studies in countries like the UK, USA, Canada, Ireland, Australia, New Zealand, Ukraine, Dubai, Singapore or Namibia.

Patient-Centred Care

The course emphasizes patient-centred communication, enhancing your capacity to empathize and connect with diverse patient populations.
